

Captivate and delight with (real!) personalization

We use a unique blend of journalists/librarians and computer visioning technology to achieve best-in-class video recommendations.

Vubble amplifies only quality content. Our library of +56k credibility-checked videos covers a world of topics, from Science, Business, COVID-19 + more (and growing).

Have a digital video library?

Does it need sorting? We are the journalist-in-the-loop meta data labelers you're looking for.

Truly simple integration

Delightfully simple.

With one snippet of code, Vubble delivers truly-targeted video recommendations in real time (but not in a gross ad-marketing way).

Set it, forget it and leave it with us.

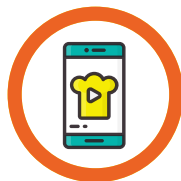

We come by this honestly

Get to really know your readers/watchers/subscribers. Generate truly good first party data for the coming cookie-less world.

Vubble is people-first, always. Our products meet the world's toughest privacy and ethical AI standards (we're pushing for them to be tougher).

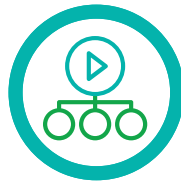

We are not a black box. We're with you in the fight to amplify quality information. We use machine learning to do that at scale. Our transparency will astound you.
